Prismalette Retrofit

Retrofit kit for Prismalette luminaires

Prismalette Retrofit is an energy-saving retrofit solution for non-LED Thorlux Prismalette luminaires.

Prismalette Retrofit is fast to install, enabling an easy upgrade to modern LED technology while retaining the original product body and minimising waste. Retrofitting luminaires with energy-efficient LEDs lowers greenhouse gas emissions; it can also improve visibility, comfort, and light quality. Further benefits include lower maintenance requirements, longer lifespan and improved durability. Integrating lighting controls like SmartScan results in efficient usage management, further reducing energy use.
