Ventego

Tamper-, impact-, and ligature-resistant surface LED luminaires

The hardy Ventego is a ligature-resistant, low-profile, and durable surface-mounted luminaire.

Ventego is designed so the luminaire body dissipates heat, ensuring a longer working life for the control gear, even in higher ambient temperatures. The impact-resistant polycarbonate cover and extruded aluminium body with die-cast ends have been designed to be as robust as possible; accordingly, Ventego is rated IP65 for water and dust and IK11 for impact resistance.

Applications: cold stores, mental health, car parks, public areas, railway stations, foot bridges, and underpasses.

- Body dissipates heat, ensuring long control gear life in higher ambient temperatures
- Suitable for both individual and in-line mounting
- Complies with food production standards IFS, HACCP and BRC
- SmartScan Radar versions with sensor discretely hidden behind the cover
